VISUAL RECORD

Plate: host-composed reference board · generator `scripts/build_gm_visual_assets.py` · prompt: none (no model call) · palette `contracts/cb.tokens.v2.json` · licence CC0-1.0 · role: orientation · not a diagram of the course.

WHAT THIS PACK IS NOT

A support label is recorded, never inferred. A source with no access date prints “access date not recorded”. No value in a plate is a course fact.

Visual caption sheet

Caption. World visual — generated plate; orientation only, not a diagram of the course.

Text equivalent. A lantern district at dusk: three paper lanterns, a cafe counter with two stools, a noren doorway panel, a cup with steam. Nothing in the plate carries a word, number, instruction, measurement or rating.

Provenance. host-composed · `scripts/build_gm_visual_assets.py` · no model call · CC0-1.0 · role: orientation.

This sheet is optional. In `low_ink = true` the plate is omitted and both the caption and the text equivalent are kept.
